AS LEADERS IN SAME-DAY SURGERY, WE PUT YOU FIRST

SurgiCare of Jersey City is a fully accredited, Medicare-approved ambulatory surgical center that offers top-notch medical care in a warm, inviting setting.

Our surgeons are leaders in their therapeutic areas, and they work with an expert team of anesthesiologists, clinicians and office staff. Our state-of-the-art suites are equipped with the latest technology, which enables our surgeons to perform the latest and most efficient minimally invasive procedures.

Our treatment is unparalleled, but it's our personal approach to care that sets us apart.

WHY CHOOSE A SAME-DAY SURGICAL CENTER?

Having your same-day procedure done at a smaller, privately owned multispecialty surgical center offers many advantages, including:

Safety — Studies show that serious postsurgical complications are extremely rare after surgery performed at a same-day surgical center. Additionally, rates of postsurgical infections are 50% lower at same-day surgery centers, compared with hospital-based surgery. And in many cases, localized anesthesia can be used instead of general anesthesia, thus lowering the risk of adverse effects from anesthesia.

Board Certified Anesthesiologists — Our team is ready to provide General, Sedation, and Regional Anesthesia for your surgery. Rest assured that you will be safe, and have no lasting effects.

Cost — Because same-day surgery centers don't assess the operating room, overnight admission and floor charges common at hospitals, most procedures are less costly. As a result, your co-pay could be hundreds of dollars lower whether you have commercial insurance or Medicare.

Convenience — We're nearby. We're small and specialized, so you won't wait months for your procedure. We also have a complete imaging center on the premises, so you won't have to go off-site.

SPECIALTIES WE OFFER

Our highly skilled surgeons perform the latest minimally invasive same-day procedures in the following therapeutic areas:
